

| <b>ALBROMET 220 Ni</b>                       |  | <b>Data sheet aluminiumbronze</b> |                            |
|--|--|-----------------------------------|----------------------------|
| <b>Material properties:</b>                  | Hard and tough construction and sliding material with high resistance to corrosion, cavitation and mechanical wear. Low permeability.  |                                   |                            |
| <b>Application examples:</b>                 | Propeller, drive components, pump bodies, valve bodies, rotors, special components for ships and the chemical industry. Compression pieces and bearings, worm wheels and valve guides. |                                   |                            |
| <b>Machining tips:</b>                       | Chipping aboveboard possible with carbide tools. Because of the heat treatment (hardness reduction), welding is restricted possible.   |                                   |                            |
| <b>Typical analysis:</b>                     | Al 10,0 %<br>Fe 4,0 %<br>Ni 5,0 %<br>Mn 1,5 %<br>Others 0,5 % max.<br>Cu Balance   |                                   |                            |
| <b>Standards/Specifications:</b>             | CuAl10Ni5Fe4<br>EN CW 307 G<br>DIN 17665/2.0966<br>ASTM C63200   |                                   |                            |
| <b>Delivery formats:</b>                     | Forged parts, Extruded rods, Semi-finished products, Finished parts based on drawings  |                                   |                            |
| <b>Mechanical and physical properties:</b>   | <b>Forged</b>  | <b>Drawn / Extruded</b>           | <b>continuous casting</b>  |
| Hardness Brinell (HB 30)                     | 200 - 220  | 200 - 240                         | 170 - 190                  |
| Tensile strength Rm                          | 700 N/mm <sup>2</sup>  | 680 - 740 N/mm <sup>2</sup>       | min. 650 N/mm <sup>2</sup> |
| Yield strength Rp 0,2                        | 360 N/mm <sup>2</sup>  | 480 - 530 N/mm <sup>2</sup>       | min. 280 N/mm <sup>2</sup> |
